CHANGE OF THE FUNCTIONAL STATE OF *CHLAMYDOMONAS REINHARDTII* DANG.  
CELLS AT THE PRESENCE OF  $K_2Cr_2O_7$  IN THE ENVIRONMENT

It was investigated an influence of  $K_2Cr_2O_7$  on photosynthetic activity and cells mobility for green algae *Chlamydomonas reinhardtii* Dang. It was established that even at low concentrations of  $K_2Cr_2O_7$  cells of green algae are sensitive to its effect. Also it was determined lethal and sublethal concentrations of  $K_2Cr_2O_7$  for *Ch. reinhardtii* cells.

*Key words*: *Chlamydomonas reinhardtii*,  $K_2Cr_2O_7$ , potassium bichromate, quantity, chlorophyll *a* concentration, photosynthetic activity, mobility, energy consumption.
